Project Title

Web Development Quiz App – Interactive Quiz Application

A responsive and interactive web application that presents multiple-choice questions related to Web Development concepts and provides instant feedback, timer functionality, and score tracking.

Objective

The objective of this project is to demonstrate JavaScript DOM Manipulation by developing an interactive quiz application that dynamically renders questions, validates answers, manages timers, and calculates scores.

Description

The Web Development Quiz App is designed to test users' basic knowledge of HTML, CSS, and JavaScript.

The application provides:

- Welcome Screen
- Instructions Screen
- Circular Countdown Timer
- Multiple Choice Questions
- Correct and Wrong Answer Highlighting
- Automatic Score Calculation
- Result Page

The project focuses on creating an interactive user experience using modern UI design and JavaScript functionality.

Features

- Welcome page
 - Instructions page
 - Web Development Questions
 - 10-second timer for each question
 - Correct answer & •Wrong answer highlighting
 - Automatic score calculation
 - Result page with marks display
 - Restart quiz functionality
 - Responsive design
-

Technologies Used

Technology Purpose

HTML5 Website structure

CSS3 Styling and animations

JavaScript Quiz logic and DOM manipulation

Project Structure

Quiz App/

|— index.html

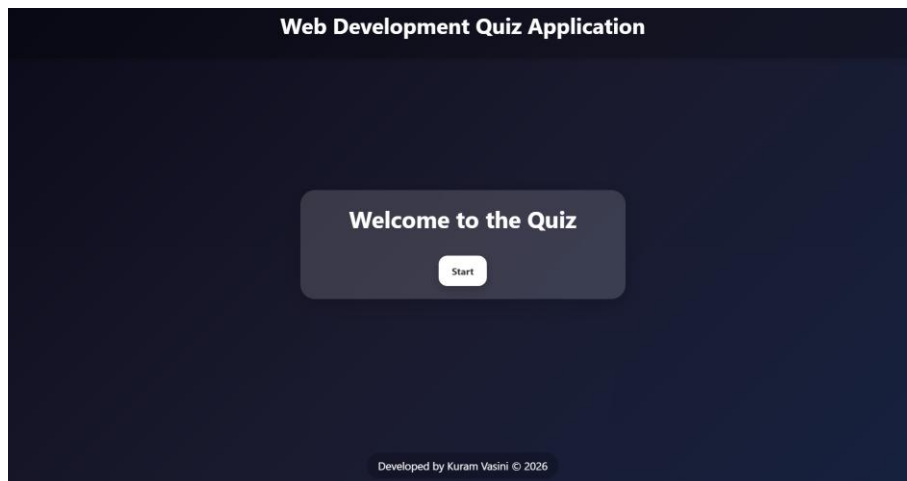

|— style.css

|— script.js

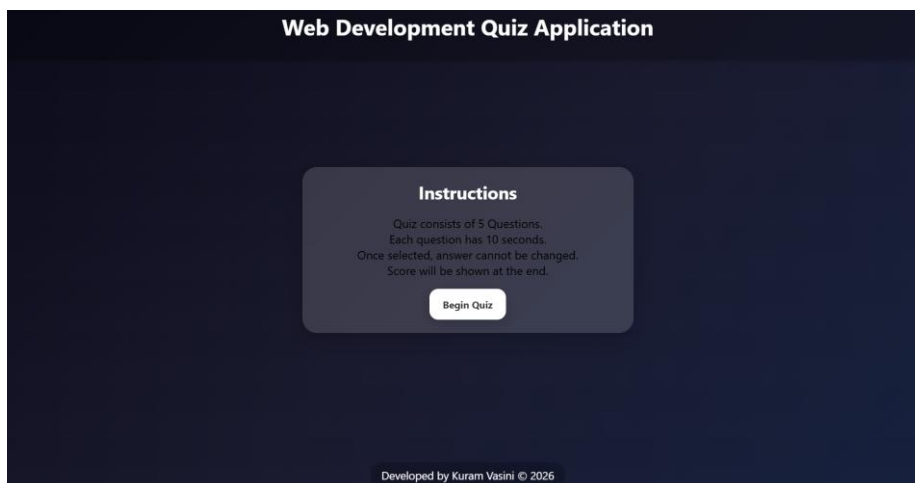

|— README.md

Screenshots

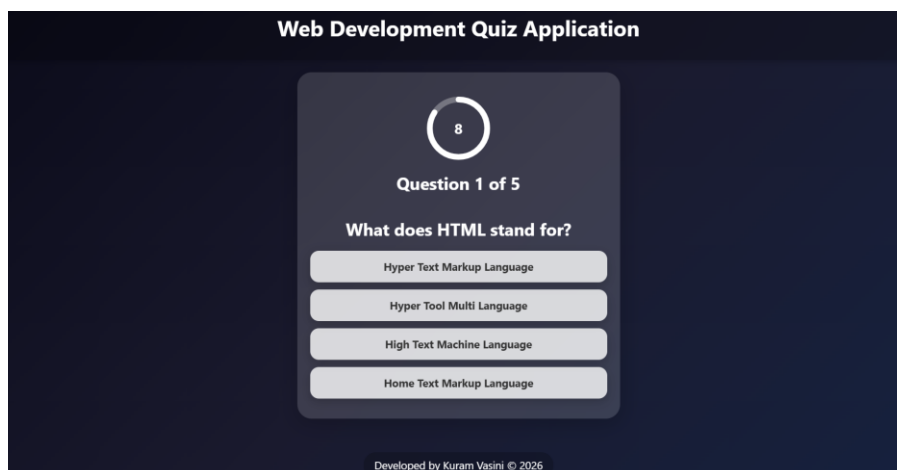

1. Welcome Screen

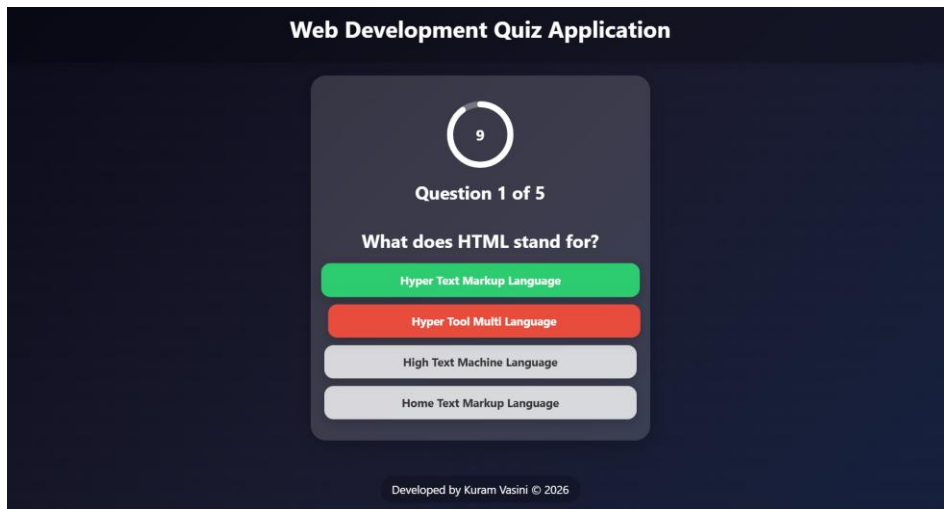

2. Instructions Screen

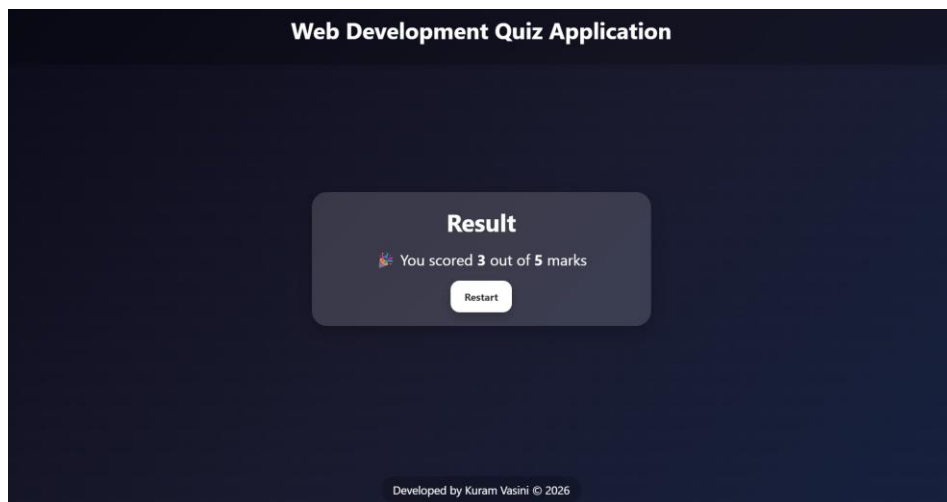

3. Quiz Interface

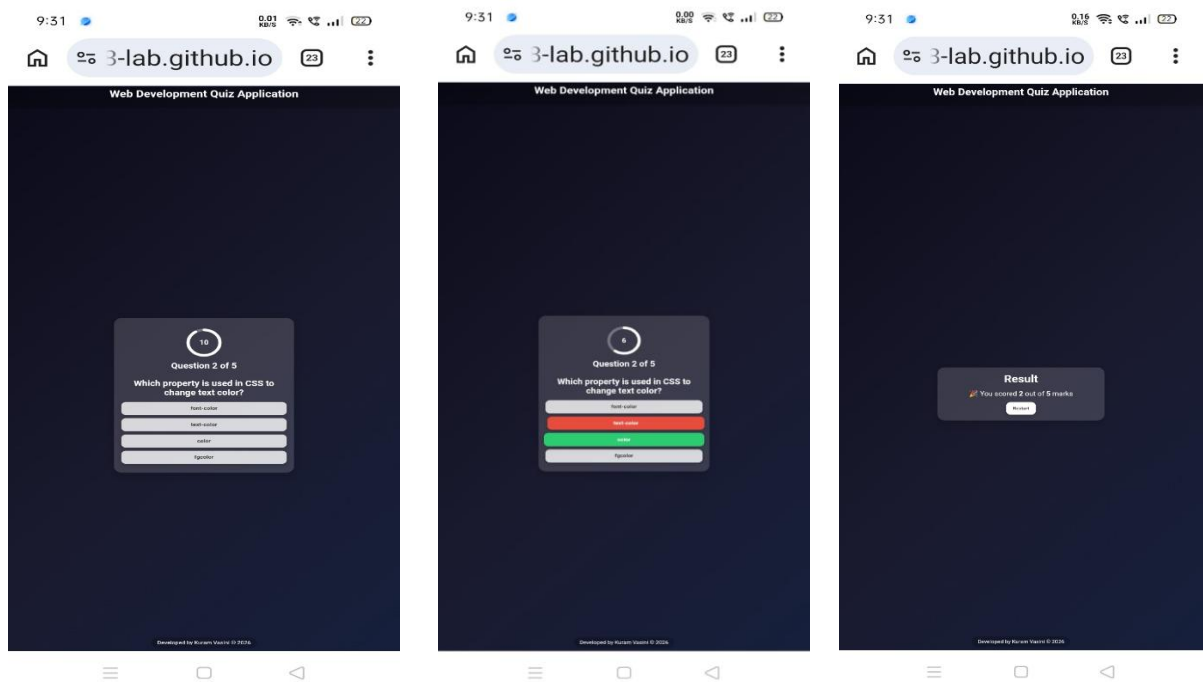

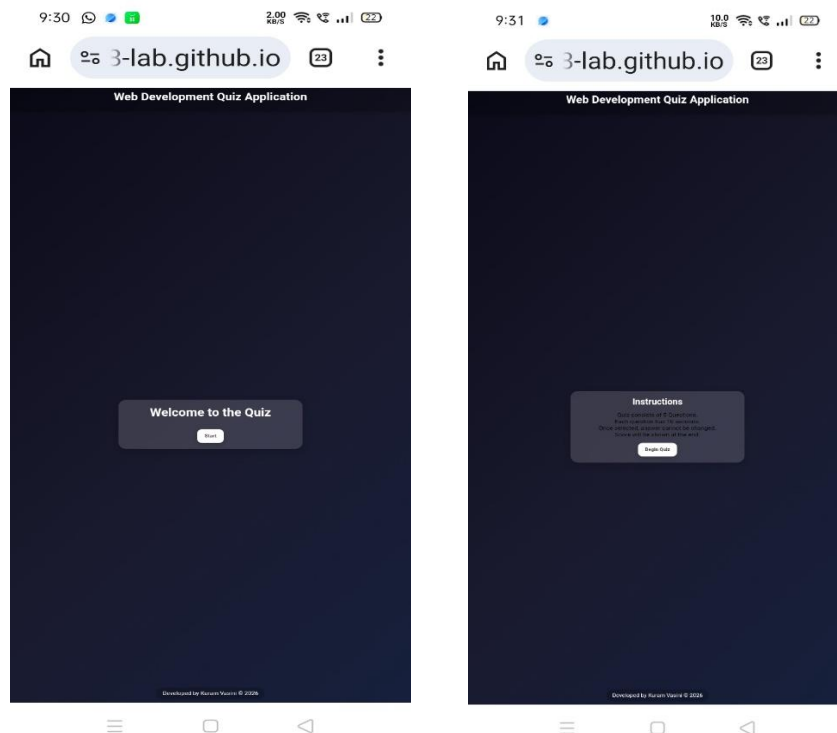

4. Correct & Wrong Answer Highlight

5. Result Screen

6. Mobile Responsive View

Code Snippets

➤ HTML Snippet:

```
<div id="welcome" class="screen active">  
  <h1>Welcome to the Quiz</h1>  
  <button onclick="showInstructions()">Start</button>  
</div>
```

➤ CSS Snippet:

```
body {  
  height: 100vh;  
  display: flex;  
  justify-content: center;  
  align-items: center;  
  background: linear-gradient(135deg, #0b0b1a, #1a1a2e, #16213e);  
}
```

➤ JavaScript Snippet:

```
function showResult() {  
  showScreen("result");  
  document.getElementById("scoreText").innerHTML =  
  `🎉 You scored <b>${score}</b> out of <b>${questions.length}</b> marks`;  
}  
  
function restart() {  
  index = 0;  
  score = 0;  
  showScreen("welcome");  
}
```

Live Hosted Website Link

<https://kuramvasini8-lab.github.io/Alfido-Tech-Internship-Task2/>

Deployment Process

1. Create a GitHub Repository
2. Upload Project Files
 - index.html
 - style.css
 - script.js
3. Commit changes
4. Enable GitHub Pages
 - Go to Settings → Pages → Select Main Branch → Save
5. GitHub Pages generates a public URL for the project.

Testing

The application was tested for:

- Welcome page navigation
- Instructions page navigation
- Question rendering
- Answer validation
- Score calculation
- Result display
- Restart functionality
- Responsive design

Browsers Tested:

- Google Chrome
 - Microsoft Edge
-

Learning Outcomes

Through this project, I learned:

- DOM Manipulation
- Event Handling
- Dynamic Content Rendering
- Timer Implementation
- SVG Circular Progress Animation
- Responsive UI Design
- JavaScript Logic Building

Conclusion

The Web Development Quiz App successfully demonstrates JavaScript DOM manipulation, event handling, timer management, and responsive design principles. The project provides an engaging user experience while strengthening frontend development skills.

Declaration

I, **Kuram Vasini** , hereby declare that this project, "**Web Development Quiz Application**," was designed, developed, tested, and deployed by me as part of my Frontend Developer Internship at **ALFIDO TECH**. The work presented in this documentation is original and was completed using HTML5, CSS3, and JavaScript.
